| – React.js   | – CSS          | – Bootstrap   | – Git     |

## WORK EXPERIENCE

### Software Engineer

Jun 2023 – Jan 2024

Control Plane Corporation

Remote - Los Angeles, CA

- Designed and implemented a cutting-edge interface for the SAAS application using Figma, focusing on enhancing user experience and visual appeal.
- Developed a powerful tool <https://www.multiregion.io/>, a platform that monitors key website performance metrics globally, providing instant alerts for high latency. Leveraged skills in **React.js, React Native, html, css and Figma**.
- Strategically fused marketing initiatives with the development of the website, harmonizing functionality with user-centric design.
- Conducted extensive testing throughout the development, ensuring the platform's robust functionality and performance.

### Software Developer

Feb 2023 – May 2023

ClearCloud Company

Hybrid - Toronto, Ontario

- Using React and **Django frameworks, Python and JavaScript languages, Docker, Kubernetes, Apollo server, Apollo client and GraphQL** to deliver a high-quality cyber-security product.
- Took a significant part in the design phase by developing innovative and visually appealing solutions that met the project's requirements.
- Problem-solving abilities have been cultivated through various challenges and situations. Effectively identified and resolved complex issues with team members.
- Demonstrated a strong aptitude for learning new technologies, showcasing adaptability and a proactive approach to expanding my skillset.

### Software Engineer

Oct 2022 – Feb 2023

Arctiq - A Benchmark Company

Hybrid - Toronto, ON

- Developed a highly successful SaaS application, utilizing **JavaScript programming language and React framework**, that generated a significant revenue of **CAD 1,250,000** and a substantial customer base.
- Comprehensive understanding of **Agile Scrum framework and Design Thinking principles** enabling me to plan sprints and successfully achieve project goals and objectives proficiently.
- Excelled in collaborative development environments, thriving on diverse team dynamics and leveraging the collective strengths of individuals.

## EDUCATION

### Kyiv national university of trade and economics

Sep 2022 – Present

Bachelor degree in Computer Science

Remote - Kyiv, Ukraine

- Wrote a scientific work about artificial intelligence and presented it at an online conference.
- Actively engaged in mentoring students, providing guidance in the creation of JavaScript and Python projects.

### Lyceum NVK 240 "Sotsium"

September 2012 – May 2022

High school diploma in Information technology

Kyiv, Ukraine

- Collaborated with few classmates to create a social media using React framework.

## ACHIEVEMENTS

### SumIT

Toronto, ON

- The SumIT SaaS platform, available on the **Azure Marketplace**, empowers businesses to monitor and improve performance across critical domains like application modernization, software delivery, and security. This innovative solution provides valuable insights, helping organizations enhance their maturity levels and identify growth opportunities. With SumIT, businesses can proactively assess SDLC performance, optimize SRE operations, and drive continuous improvement. The overwhelming response from numerous customers underscores the app's value and impact, making us immensely proud of its success.
